EDUCATION

National Institute of Technology Karnataka, Surathkal — Bachelor of Technology in Computer Science and Engineering (2019)

PROFESSIONAL EXPERIENCE

Systems Engineer at Infosys (2019-07 to 2021-06)

- Built resilient REST APIs in Python using Flask and SQLAlchemy.
- Managed database schema migrations and tuned SQL queries for customer analytics dashboard.

Software Development Engineer II at Swiggy (2021-08 to 2023-02)

- Architected order dispatcher microservice handling 45,000 requests/sec with FastAPI and Redis.
- Cut P99 delivery dispatch latency from 420ms to 180ms through caching and async processing.
- Mentored junior engineers and conducted hiring interviews for backend engineering.

Senior Backend Engineer at Razorpay (2025-01 to present)

- Designing merchant automated reconciliation platform handling \$2B+ annualized GMV.
- Streamlined payment webhook retry queues with Kafka and Golang services.

TECHNICAL SKILLS

Programming: Python, Go, SQL, TypeScript

Frameworks: FastAPI, Flask, React, Node.js

Cloud: AWS, Docker, Kubernetes, Terraform

Databases: PostgreSQL, Redis, MySQL

Tools: Git, Kafka, Prometheus, Grafana

PROJECTS

Distributed Token Bucket Rate Limiter: High-throughput distributed sliding window rate limiter written in Go and Redis with benchmarked 80k RPS throughput.

Cloud Ledger Sync: Idempotent payment ledger synchronization utility with automatic reconciliation and conflict detection.

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate
- Certified Kubernetes Application Developer (CKAD)
